SEMEN SALES

The Longhorn Cattle Society offers semen from 20 pedigree Longhorn bulls, enabling members and commercial users to obtain all the benefits of the Longhorn breed.

The Longhorn will provide the commercial suckler cow with milking ability, length, longevity, hardiness, ease of calving and rapid growth. Crossed with dairy heifers it provides easy calving and excellent growth rates.

TO ORDER SEMEN

All orders must be made, in writing, to the Society Secretary: 3 Eastgate, Stoneleigh Park, Stoneleigh, Warwickshire, CV8 2LG Tel/Fax: 0845 017 1027 Email: secretary@longhorncattlesociety.com

The order should state: the name of the bull, the name, address and telephone number of the purchaser, the AI centre/sub-centre to which semen should be sent and the name and address of your account at the AI centre

There is a TRANSFER CHARGE of £3/straw + VAT on ALL orders. In addition, transfers to AI Centres which are NOT part of the Genus network will be charged at cost (currently £60/order + VAT).

Payment in full (including transfer fees) must accompany each order.

Purchasers are responsible for any charges made by their local AI centre for the semen in their ownership, including charges for receiving straws + VAT, storage and the insemination fees charged when semen is used. The Society is not responsible for any damage or breakage which may occur in storage once the semen has been safely transferred to the ownership of the purchaser. Breeders may wish to insure expensive consignments. Breeders should allow a MINIMUM OF FOUR WEEKS FOR DELIVERY to their local AI centre. 100% conception rates are not normally achieved, It is advisable to order at least two doses of semen for each female to be inseminated.

PREMIUM BULLS

(** or *) are selected by Council as outstanding examples of the breed, likely to contribute to breed improvement. Bulls will only be selected as premium bulls when at least one crop of high quality progeny has indicated that they are superior sires.

GENE BANK BULLS

have been selected by Council to ensure that as much as possible of the genetic variation existing within the breed is retained for the future. However, this genetic variation has to be coupled with acceptable conformation and growth rate.

QUALITY CONTROL

From 1979 to 1990 Mrs Lesley Hutton was appointed as Bull Inspector. Through her the Society exercised control over the quality of all bulls registered for pedigree breeding. Since June 1990 all young bulls have been inspected by a practising veterinary surgeon.

Young bulls are inspected at between 365 and 800 days and must be free from genetic defects, must conform to the breed standard and must have acceptable conformation. In addition, all Longhorn bulls must achieve an adjusted 400 days weight of 431 kg. This represents a minimum growth rate of approximately 1 kg/day. LCS inspection weights are listed, but are not official MLC weights and should be treated with reserve. Weight differences can be greatly affected by management.

ROYALTIES

Royalties, as detailed in the price list, are payable for the registration of a bull calf. All bulls are subject to inspection by a veterinary surgeon before they are registered and any royalty payable is in addition to the veterinary inspection and Society registration fees.

The royalty payment for registration of a bull calf by a gene bank bull reduces to £50 on the death of the AI sire. Once the sire has been dead for 5 years, no royalty is payable on registration of sons got by AI

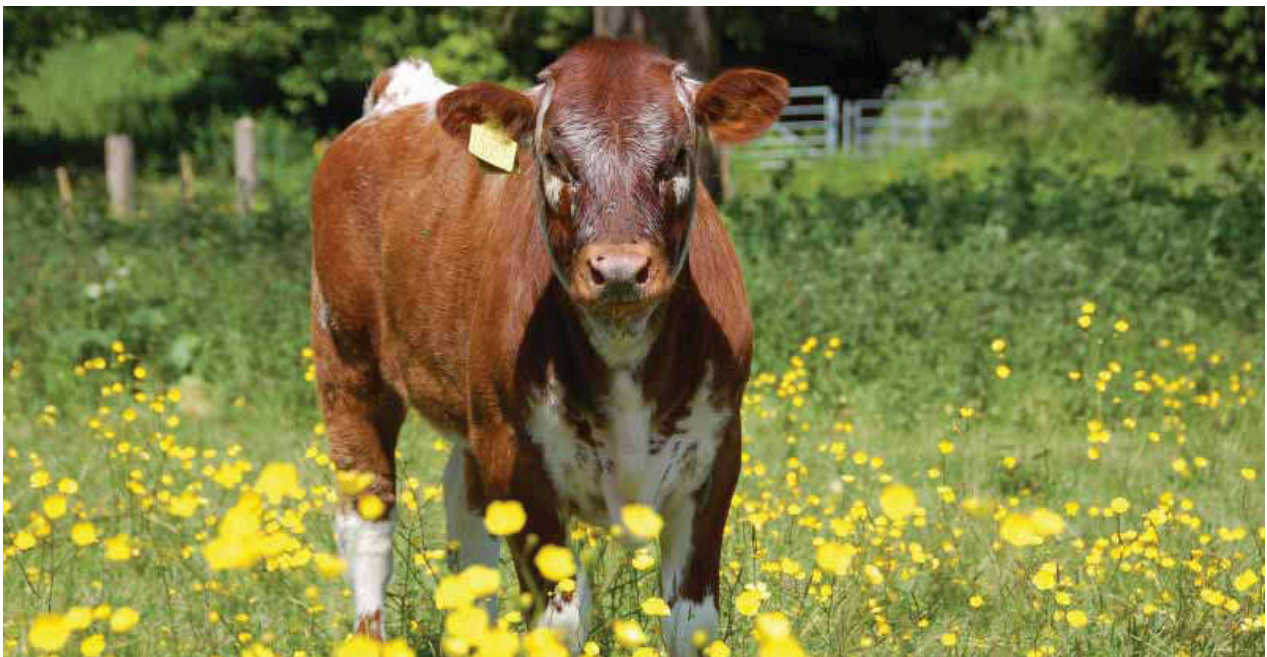

However, the royalty payment on sons got by Premium bulls does not alter after the death of the AI sire.
