### **Application to Register a Bull**

Thank you for letting me know you have a young bull you wish to register. All bulls must have been birth notified before they were 3 months of age. Please find the form to apply for registration below.

A form must be completed for each bull, and signed by a practising veterinary surgeon when the bull is between 365 and 800 days of age, or has gained the minimum weight of 431kg. It must be returned to this office with four colour photographs of the bull, one taken from each side, one from the back and one from the front of the bull on hard standing so that his feet are visible. If possible we would also like a photograph of the bull's dam as we are currently assessing the maternal characteristics of registered bulls' dams for the purpose of breed improvement.

In addition I require a dated certificate of the weight of the bull, authenticated by either a practising veterinary surgeon, a livestock market official or MLC official. Alternatively a ticket from a public weighbridge would be acceptable.

The registration fee of £100 + VAT, and necessary royalties for bulls got by A.I. must also accompany the application for each animal.

Details of the rules concerning registration and the minimum weight requirements are listed in the Society Herdbook, and A.I. royalty fees on bulls got by A.I. are in the Journal.

I look forward to hearing from you.

Yours sincerely

Debbie Dann
