## **LONGHORN TYPE CLASSIFICATION SCHEME**

Type classification has been standard practice for many years and is seen as a clear, understandable method of grading cattle using independent assessors. By having their cattle graded, members gain a better understanding of the strengths and weaknesses of their cattle and can then select and breed accordingly to improve not only their own cattle, but in turn the national population of Longhorns. Cattle are assessed for conformation and they are awarded an overall grade (eg VG, EX) and a numerical score. Once an animal has been graded he/she does not need to be re-presented but can be put forward for re-inspection if the owner wishes. No animal's score can go down on subsequent inspections, they can only either stay the same or go up. Animals that have been re-presented and achieved a higher score have an asterix against their score.

First calved heifers are scored more 'severely' to allow room for manoeuvre

Animals can make the following maximum scores

### **FEMALES**

Heifers - maximum 89 points

2nd calvers - maximum of 89 points

3rd calvers - maximum of 93 points

4th calvers - maximum of 95 points

5th calvers - maximum of 97 points

### **MALES**

18-24 months - maximum of 89 points

24+ months - maximum of 97 points

Buyers can use the score, alongside their own visual assessment, to inform their buying decisions.

## **HEALTH INFORMATION**

Cattle forward for sale must either be accredited via a CHeCS recognised Health Scheme or individually tested for BVD, IBR and Johnes as detailed on the health declaration. All cattle, other than calves at foot, must be vaccinated for BVD.

Testing for Leptospirosis and Neospora is highly recommended. All entry forms must be accompanied by the completed health declaration

Information on test results are in the catalogue if the results are received prior to publication, or available from the vendor on the day of sale.

Interested buyers and sellers are encouraged to discuss the health status of the seller's herd. To that effect, sellers should have a copy of the blood test results and Health Scheme accreditation with them at the sale.

All cattle must be pre-movement tested for TB, irrespective of the vendor's TB test interval.
