INSPECTION PROTOCOL

This gives confidence to buyers that the animals have been passed as fit for sale and alongside the rules and conditions of sale agreed by the industry through the National Beef Association ensure that buyers purchase guaranteed stock. All animals will be checked by a veterinary inspector for eye defects, over or under-shot jaws and general health. In addition bulls will have their testicles measured and will be checked by hand for any irregularities in form or texture. Similarly, females' udders will be checked for abnormalities.

Society appointed inspectors will then assess bulls and females for locomotion, temperament, conformation and breed characteristics to a Society standard. Eartags will also be checked by an official representative and must be accurate and legible. Any bull or female that fails the inspection cannot be shown and may be offered for sale at the Auctioneers discretion .
