Explanation of Johne's Disease Risk Levels

Level 1: There have been three clear annual herd tests. This is the lowest level of risk.

Level 2: There has been a current clear herd test, but has not yet gained level 1 status.

Level 3: At the most recent herd test there are reactors in the herd at the level of three percent or fewer.

Level 4: There has been more than three percent reactors at its most recent herd test.

Level 5: Those herds without a health plan for Johne's disease and that do not adhere to the mandatory elements of the health plan are Risk Level 5. This is the highest level of risk and additionally applies to herds that carry out no testing.

Once a herd has been accredited at Level 1, achieved two further clear tests, with more than 20 home-bred adults in the herd, the herd can opt for biennial testing providing all cull cows and animals not born in the herd are tested in the intervening year.

Selling on animals that have been purchased from another herd: When an animal is purchased from a herd with an inferior Johne's disease risk level than the herd to which it is added, the purchased animals retains the risk level of the herd of origin should it be sold on. For example it cannot be sold as risk level 1 if purchased as risk level 2, 3, 4 or 5. Animals that are purchased from a herd with a superior risk level can be sold only at the risk level that applies to the purchasers herd at the time of the subsequent sale. For example, an animal purchased as risk level 1 into a risk level 4 herd can only be sold at the risk level that applies to the level 4 receiving herd at the time of subsequent sale. Morris Marshall & Poole with Norman Lloyd are Supporting the Future of Farming

We are proud to work with The Agricultural Mortgage Corporation (AMC) the leading supplier of long-term funding for the Agricultural Sector. The Agricultural Mortgage Corporation (AMC) has been providing medium to long term finance solutions to farmers and rural businesses since 1928. They remain the leading specialists in the rural sector, lending to all types and sizes of farms, landed estates and rural business in the UK.

AMC Loans can support a wide range of purposes including:

- Buying Land and Property
- Building Improvements
- New Buildings and Fixed Equipment
- Purchasing Machinery
- Restructuring Borrowing
- Diversification both on and off farm including Holiday Lets and Buy to Lets etc.
- Paying out a Retiring Partner

Lending Options:

- You can borrow from £25,001 upwards
- Flexible terms ranging from 5 to 30 years
- Fixed or variable interest rates or a combination of both or interest only
- Fixed* or variable interest rates, or a combination of both, on either a Repayment or Interest Only basis

As well as lending to core agricultural businesses AMC can also provide finance for rural enterprises that may not be directly linked with agriculture. Taking into consideration both on and off farm income, finance can be used to support a variety of agricultural or commercial plans.

**There is always a possibility that interest rates may go down leaving a fixed rate loan at a higher level compared to a variable rate loan. However, if interest rates rise, a fixed rate loan will remain at the same rate.*

As the leading AMC agents within our region and a team who have over 60 years' experience between them, we have helped our clients find tailored and competitive agricultural loans through our relationship with AMC. We can discuss your financial needs and help push your business forward.

AMC loans available for business purposes only, provided on a secured loan basis. Minimum AMC standard loan £25,001. To meet customer requirements, lending criteria will vary. Lending is subject to status

For further information or to discuss the options of borrowing from AMC and how they could assist you please contact Morris Marshall & Poole with Norman Lloyd's AMC Team:
