Buitelaar Group are looking for native-bred cull cows

Buitelaar Group has been in the livestock and meat industry for over a century, having built up the UK's largest integrated beef supply chain with a strong focus on connecting farmer and consumer.

Processing native-bred fat cattle as part of the Group's regenerative Heritage Scheme, Buitelaar are now introducing native-bred cull cows to their kill. The scheme is designed to premiumise traditional breeds from the UK.

Payment will be received within 7 working days of processing and haulage can be arranged from most areas.

Cull cow processing is available from the 14th June.

For more information, call Edel on 07984343596.
